

## **EMIGMA for Academics**

The Academic license offers the same capabilities as EMIGMA Professional Complete for Near-Surface. The essential difference in price is PetRos EiKon's contribution to the educational programs at universities teaching students data handling and modeling skills. We are sure that the familiarization with EMIGMA and different techniques used therein will not only result in the students' proficiency with this very product but will also arouse their further interest in geophysics and help them develop their intuitive abilities.

This license is available to any teaching institution anywhere in the world.
